

TGS

Vandal-proof inspection boxes for roof surfaces with light vehicle traffic

ADVANTAGES

- Usable for roof surfaces burdened with car traffic
- High durability
- The material is shockproof and UV proof
- Maintains clean drainage system

Stone pavement
Laying
VLF-200 filter layer optional
Crushed stone bed
DiaMassive-25 drainage board
(filled with crushed stones)
VLU-300 mechanical protection layer
Root resistant water proofing
Structure/further layer structure

SPECIFICATION

Especially recommended for public areas, locations with high regularity of light vehicle traffic and in locations susceptible to damage. Extremely stable, strong square shaped inspection box made of polypropylene, 30cm height, steel cover, colour of the plastic base RAL 7032.

APPLICATION

TGS products ensure the unobstructed drainage of roofs, professional maintenance of water outlets and protect the structure against violent impacts while excluded from the superstructure of public spaces or surfaces with light vehicle traffic.
