## Description

**Asteras Vouliagmenis**, one of the most historic hotels in Athens, has been completely renovated. The Doxiadis+ office undertook the landscape architectural design, where the main concern was the integration of the building with the intense natural environment of the area through the creation of green roofs. AKTOR SA undertook the reconstruction of the building, while DIADEM systems (**DIADEM-150**, **DIADEM-350** & **DIADEM-750**) were chosen for the infrastructure of the green roofs.
