

MOU SA

Project information

LOCATION: PANORMOU

PROJECT OWNER: MINISTRY OF ECONOMY AND DEVELOPMENT

GREEN ROOF DESIGN: PRASINI STEGI-DIADEM GREEN ROOF SYSTEMS

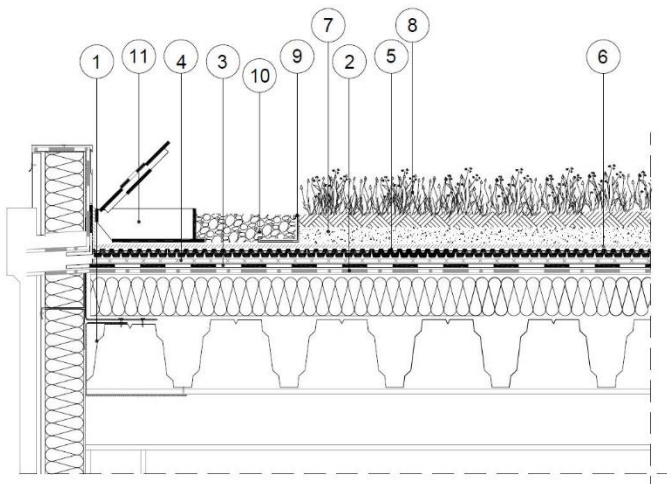

GREEN ROOF CONSTRUCTION: GREEN ROOF, LANDCO LTD

YEAR OF IMPLEMENTATION : 2008

Description

The roof of the eight-storey building of MOU S.A. with a total area of 250TM, in the Ambelokipi area was transformed into a beautiful garden using the expertise of PRASINI STEGI and the systems of the international firm DIADEM® Green Roof Systems.

The planting on the roof of the MOU S.A. building gave a breath of fresh air to the workers, who often visit it during their breaks and lowered the building's energy consumption for cooling and heating. It also functions in other ways, absorbing pollutants, and releasing additional oxygen, reducing the load on the drainage system, providing long-term protection of the roof insulation, while at the same time creating a functional space for small events and meetings.

1. Building construction
2. Waterproofing membrane
3. Antirroot membrane FLW-400
4. Moisture retention & water protection mat VLS-500
5. Drainage board DiaDrain-25H
6. Filter sheet VLF-150
7. Growing media SEM
8. Vegetation
9. Edging element KLS AL 8/12
10. Gravel
11. Inspection box KSA-10

Green Up the Roof!
