

The Butterfly-Noval S.A

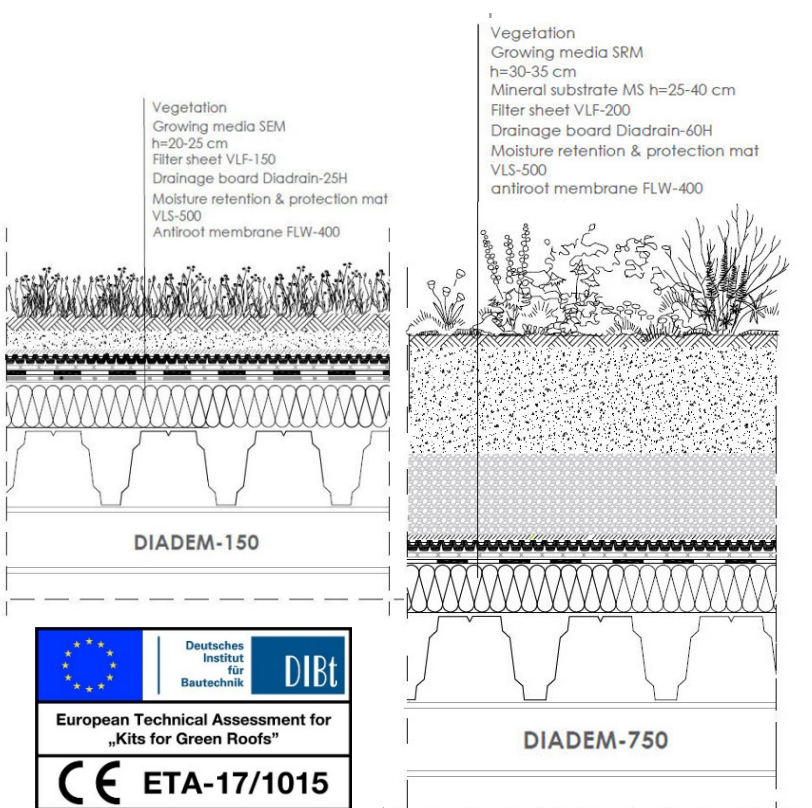

Project information

LOCATION: CHALANDRI
PROJECT OWNER: NOVAL PROPERTY DEVELOPMENT
ARCHITECTURAL DESIGN: YAP ARCHITECTS
CONSTRUCTION: REDEX SA
YEAR OF IMPLEMENTATION: 2019

Description

Noval SA's new office building in Chalandri was completed in early 2019 with a LEED (Gold) certification. The architectural design of the building, which is characterized by bioclimatic elements, was undertaken by Yap architects. A characteristic of the building's bioclimatic design was to cover all the roofs at each level of the building with planting.

The modern **DIADEM** systems were chosen for the construction of the green roof infrastructure, where according to the design the extensive type **DIADEM-150** was implemented at areas of low planting and the **DIADEM-750** type was implemented at the larger soil depths and low to high planting.

Green Up the Roof!
